

# **Ride-on Rain Covers Installation**

## **Goldwing F6B**

Your new Ride-on rain covers will protect your Ultimate seats from the elements. Use them for rain and sun protection and your seats will look like new for years. Our seat rain covers are made using the same material as “Frogg Toggs rain suits” this material is light and breathable and has welded seams.

**The material has no stretch so care must be taken when installing, pull on the elastic edging not the welded seams.**

**Remove your Ultimate rider and Ultimate passenger backrests before you start installation.**

The covers have a white tab to mark the front.

1. Locate the front white tab and with a hand on both sides slide the cover nose from side to side and down between the seat and the tank.
2. Now pull the sides of the cover down on each side and tuck it under the seat.
3. Now connect the Velcro straps around each grab handle and pull the cover to the bottom of the handles and under the seat.
4. Now pull the cover over the back of the seat and get the elastic down under the seat.
5. Push the sides down in between the handles as best you can, its tight.
6. All rider and passenger backrest covers install from the side.

Before you fold up the covers and place them in the storage bag make sure they are completely dry.
