

Ride-on Rain Covers Installation

Can-Am Spyder all models

Your new Ride-on rain covers will protect your Ultimate seats from the elements. Use them for rain and sun protection and your seats will look like new for years. Our seat rain covers are made using the same material as “Frogg Toggs rain suits” this material is light and breathable and has welded seams.

The material has no stretch so care must be taken when installing, pull on the elastic edging not the welded seams.

Remove your rider backrest before you start installation.

The covers have a **white tab** to mark the front.

1. Pull the cover over the two front corners of the seat and then pull the cover to the back and over the back of the seat.
2. You can now lift the seat and pull the sides of the cover down on each side and tuck the elastic edges under each side of the seat.
3. When you close the seat down hold the front of the cover down so it stays under the front between the body and the seat or you can leave it on top.
4. All rider backrest and RS passenger backrest covers install from the side.
5. The RT passenger backrest has no rain cover because it is completely vertical the water runs off.

Before you fold up the covers and place them in the storage bag make sure they are completely dry.
