

Kawasaki Vulcan 2000 Classic & LT 2004 and UP

Ultimate Seats Installation

Installs like stock seats

Removal of Stock Seats

1. Remove the right hand (throttle) side cover below the seat and pull the passenger seat release cable.
2. Lift passenger seat up and forward to remove.
3. Remove the two bolts holding the rider seat.
4. Slide rider seat back and up to remove.

Install your new Ultimate seats

All the mounting brackets are already installed on your Ultimate seats

1. Install your new Ultimate rider seat by locating the front seat bracket under the tank locator and install the two stock bolts into the rear brackets (same as stock)
2. To install your new passenger seat make sure your bike is in gear so it won't roll forward then place the seat in position on the fender and standing behind the bike push forward on the seat and down in the back until the rear locator bracket hooks into the fender bracket, now push down on the front of the passenger seat to latch it in.
3. If you have the Ultimate passenger backrest pad you install it exactly the same as the stock pad. The Ultimate pad gives your passenger two inches more room.

Enjoy the ride again on your Ultimate Seats.
