

Kawasaki
Vulcan 900 Classic 2006-up and Custom 2007-up

Ultimate Seats Installation

Install kit

2 white plastic spacers

#1. Remove original seats from your bike. Insert ignition key into left side cover and turn key clockwise to unlock stock seat. Lift rear of seat up and then back to remove.

#2. Remove the latch bracket from your stock seat – 2 nuts 10mm wrench.

#3. Install the latch bracket onto your new seat, use the 2 supplied white plastic spacers under the latch plate, between the plate and the seat pan, use the 2 original nuts, do not overtighten.

#4. Install your new seat exactly like stock. Slide front locating bracket into the under tank locator and then push down on the center of the seat until you hear the latch click in.

Enjoy the ride again
