

# **Ride-on Rain Covers Installation**

## **Goldwing GL1800** **Model Years 2018 and Up**

Your new Ride-on rain covers will protect your Ultimate seats from the elements. Use them for rain and sun protection and your seats will look like new for years. Our seat rain covers are made using the same material as “Frogg Toggs rain suits” this material is light and breathable and has welded seams.

### **Note**

**The material has no stretch so care must be taken when installing, pull on the elastic edging not the welded seams.**

**Remove your rider backrest before you start installation.**

The covers have a white tab to mark the front.

1. Locate the front white tab and install each front corner onto the seat nose corners then pull the cover to the back and over the back of the seat.
2. You can now pull the sides of the cover down on each side and tuck it under the seat.
3. The passenger backrest pad is waterproofed and as its vertical the water runs off so no need for a rain cover.

Before you fold up the covers and place them in the storage bag make sure they are completely dry.
