

Installation kit includes

- Hex key 4mm (1)
- Bolt M6 x 25mm (1)
- Slotted spool (1)
- Nylon washer (1)

Yamaha Road Star Ultimate seat installation

Your new passenger seat has the connecting bracket already installed.
Do not remove the connecting bracket from the passenger seat.
Remove original passenger seat attachment bracket from the rear fender

Install the supplied spool – using the supplied screw (4mm Hex key) into the center threaded hole in the fender where you removed the original bracket.
The nylon washer must be under the spool, between the spool and the fender.

Now you can install the Ultimate passenger seat, the front passenger seat bracket goes over the spool and then slides back to lock in.
Line up the rear bracket hole with the original threaded hole in the fender and install the original bolt.
Now you can install the rider seat, **make sure you have the rear locator on the seat correctly into the fender bracket locator and not sitting on top of it** and click down into the front key lock just like your stock seat.

Enjoy the ride again
