

Can-Am Spyder RT – models 2020 and up Ultimate heated seat Installation - one pc seat

Install Kit

Heated seat adaptor harness = 1 pc.

Zip Tie = 2 pc.

Seat prop support = 1 pc.

Removal of Stock Seat

1. Remove the stock passenger seat and disconnect the heat plug.
2. Lift the driver seat and remove the top bolt from the lift arm, store the bolt.
3. Remove the two hinge bolts, store these parts with the stock seat.
4. Disconnect the heat plug and remove the stock driver seat from the trike.
5. Remove the stock driver backrest receiving bracket and store it with the backrest.
6. Zip tie the top of the lift arm back to hold it from moving around, **pics 1&2.**
7. Remove the latch pin from the stock seat and adjust the length as shown below **pic 3.**

Picture 1

Picture 2

Adjust the latch pin length by loosening the two lock nuts and measure as per picture.
Now install the latch pin with washer into the Ultimate seat and tighten it down.

Picture 3

Removal of Stock Passenger Backrest / Installation of Ultimate Passenger Backrest

1. Remove the two screws inside the trunk and remove the stock passenger backrest.
2. Now install your Ultimate passenger pad with the two supplied screws in the pad.
3. The heat pad wire must lay in the groove on the left side and zip tie as shown, **pic 4.**
4. Now plug in the supplied heat adaptor harness and plug in the pad connector, **pic 5.** A= to power from bike. B= power to passenger backrest. C= power to seat.
